Desktop services
NaviCloud DaaS is NaviSite’s leading-edge alternative to traditional VDI and labor-intensive desktop support, providing you with a simple, secure, and complete desktop experience in a virtual environment. This cloud-based, on-demand, scalable, pay-as-you-use platform enables a seamless and secure transition to the Cloud from costly, potentially at-risk physical machines, safeguarding data while adding a new layer to your organization’s resiliency competencies.

Infrastructure services
NaviSite’s Infrastructure-as-a-Service solutions, NaviCloud Sphere and NaviCloud Director, allow you to provision on-demand, scalable, usage-billed, and infrastructure services from virtualized resource pools. With NaviSite, customers get the scalability and flexibility of cloud computing as a managed or self-service solution that can be personalized to address your company’s security, availability, flexibility, and performance needs. NaviSite IaaS solutions can help you:

• Compete efficiently – Rapidly test and roll out new customer-facing applications.
• Control growth and uncertainty – Adapt your computing environment to changing IT requirements brought on by mergers and acquisitions, dynamic industry standards, application development and testing, and other upticks in the demand for computing resources.
• Support internal IT initiatives – Build scalable, productivity-enhancing employee applications, such as worldwide human resource portals.
• Reduce application management costs – Move back-office applications to a highly secure, cloud-based infrastructure.
• Ensure business continuity – Restore IT environments and help combat data loss.
• Prepare for phased cloud deployments – Build and deploy hybrid clouds.

Simplify your IT while enhancing security, performance and resiliency with NaviSite Cloud and Managed Solutions.
**SECURE STORAGE SERVICES**

At NaviSite, we understand that cloud storage is all about leveraging a flexible, scalable, secure, and reliable solution to manage increasing volumes of corporate and employee data. With this in mind, we created a powerful portfolio of storage, backup, replication, and archiving solutions. Through a partnership with EMC, NaviSite also provides a premier storage portfolio extending beyond traditional cloud storage to meet the compliance, accessibility, and security requirements of enterprises like yours.

**MANAGED APPLICATION SERVICES**

Many businesses are turning to NaviSite for a cost-effective, fully managed application service. NaviSite offers managed application services for many enterprise applications – including Microsoft Dynamics, Exchange, SharePoint, Oracle, PeopleSoft, and more. Unlike many other application-hosting providers, NaviSite’s cloud-based service includes complete lifecycle management, full upgrades and round-the-clock support. Whether you are modernizing the applications pertinent to your daily operations or integrating the standards put in place by a new acquisition, NaviSite simplifies the obligations of managing and maintaining a secure, reliable, and compliant application environment.

**Key Benefits of NaviSite Cloud Services**

**Lower Total Cost of Ownership**
- **Usage-based billing:** With a billing model that is linked to the provisioning process, you can avoid hefty costs associated with in-house data centers and reduce the investment required when compared to traditional in-house infrastructure hosting alternatives.
- **Efficient Resource Utilization:** The virtualized slices of resources ensure you purchase and use only what you need, eliminating hidden costs of IT resource underutilization.

**Business Agility and Operational Efficiency**
- **Speed of Deployment:** Infrastructure-as-a-Service accelerates the time to value by eliminating long procurement cycles associated with in-house development projects, and ensuring deployments move quickly from staging to live production.
- **Simplified IT Operations:** The fully managed option delivers an enterprise-class, cloud-enabled IT environment, eliminating the complexity of managing an in-house data center.

**Guaranteed Service Levels and Business Continuity**
- **Guaranteed Service Levels:** NaviSite’s IaaS solutions are backed by industry-leading service level guarantees for performance, 99.999% availability, and response and resolution.
- **Business Continuity and Performance Manageability:** NaviSite’s managed cloud services include 24x7 monitoring and support, and leverage the NaviCloud architecture – spanning multiple data centers – providing built-in disaster recovery.
- **Disaster Recovery (DR) Options:** NaviSite works with companies to architect disaster recovery solutions tailored to meet specific enterprise data recovery requirements, while maintaining consistent standards of reliability and accessibility.
